Class & Comm

Interactive Response System

Amazing graphics
and animation

Key Features

- New 3D interactive games
- Formative and summative assessment
- Complete curriculum content
- Easy to use interface
- PowerPoint integration
- Different types of questions - True/False, Alpha/Numeric, Yes/No, single and multiple responses

ClassComm is an innovative interactive response system. Utilising radio frequency Genee Pads, it makes learning engaging and fun! Designed for use with whiteboards, plasma screens or just a projector and pull down screen - this technology is truly created for both the classroom for the future and the corporate market.

Formative and summative assessment can be easily undertaken and questions can be set in a wide variety of forms. Pre-customised questions can be used and new ones created during the delivery of a session, which gives flexibility and personalisation. Results can be gathered instantly enabling the identification of areas that require further clarification during a session or may be used as a testing mechanism.

Who is it for?

- Primary Schools, Secondary Schools, Colleges, Universities, Learning Centres, Conference Centres

What makes it different?

- 3D Interactive Games

ClassComm Includes:

- **Genee Pads**
- **Brand New ClassComm Software free.**
- **Free Genee Pad Carry Case**
- **Wordwall Standard Edition**

ClassComm comes with a range of pre-set (educational) questions and resources including 3D interactive games to aid the learning process. With its ease of control and individual style this is the latest product from Genee World that provides dynamic and exciting presentations. The system is RF and wireless based, it provides freedom of movement without the problems of cables or sitting in line of sight to a receiver.

With the Genee Pads, even the most reserved child has the chance to shine in the classroom environment, because their response is taken from the Genee Pad not a raised hand. With ClassComm every child matters, helping to develop confidence and increase the desire for learning.
